

# Introducing the BIW Learning Center.

The BIW Learning Center is a 24/7 online resource for BIW customers to take self-paced training designed to successfully install BIW connector systems.

Training to become a Certified Installer in a particular product is a three-step process, where each step is awarded with a certificate:

- Complete the 24/7 online courses for the product.
- Receives hands-on classroom training for the product.
- Complete the requisite on-site installations under the supervision of a Certified Installer for the product.

Successfully taking all three steps earns the Certified Installer designation, which is valid for an average of two years before the need for recertification. Reports can be generated showcasing the certificated users.

## Login Procedure:

- In your browser, enter <https://ittbiw.litmos.com>
- Enter your **Username**, which will be your email address on record.
- Enter your **Password** as shown in your welcome email.
- If your password is not known for any reason, not to worry!** Click the link on the login page and create a new password. The password should contain: 1 upper case, 1 lower case, 1 number, 1 special character, at least 8 characters in all.
- Click, **Login**.

## Learner and Team Leader Views

Most people logging into the BIW Learning Center will be assigned as a **Learner** in a particular team. One or more people in a team will be assigned as a **Team Leader**. A team leader can also switch back and forth to see the learner view.

### 6. Learner View

This view is designed for people who want to start learning right away.

### 7. Team Leader View

This view is designed for people who want to carryout administration tasks in addition to learning.

SAP Limes Product Notifications: We're excited to share that our next major update is just a week away! This product update is scheduled to ship on August 18th at 10:00 am PST. You may reference the release notes to get more details on the features that will be launched with this update. Please prepare for an 15-20 min period of intermittent connectivity and periodic downtime during this product release, so that our team may sync with our reporting engine.  
IMPORTANT ANNOUNCEMENT: The Limes API no longer supports the use of the API key in the request URL. For accounts created after June 21st, all accounts must migrate to use the API key in the request header by November 2019. Please plan to migrate all integrations accordingly.
